

WE BUILD FROM A TO Z

# DESIGN OFFICE

# DESIGN OFFICE

Adamietz company offers projects of industrial buildings for various industries. We design unique buildings, which perfectly fit into the existing environment, are modern and feature an outstanding design. We work in accordance with current trends taking into account local requirements and individual investors' expectations.

We provide designs of industrial facilities based on steel or reinforced concrete structures, including: steel buildings for industrial and storage building use, production floors, commercial and logistic facilities, sorting facilities, walk-in freezers and deep-freeze storage facilities. At each work stage, our designers consult the proposed solutions with the customer's expectations. As a result, the designed facility is in full compliance with the investor's requirements.

We select building and finishing materials with utmost care ensuring both safety and aesthetics of the buildings.

Well-trained, creative designers having an extensive technical knowledge and using cutting-edge equipment offer their experience and advice.

They provide comprehensive solutions which, depending on the decision, will be assigned for implementation by Adamietz Group or will be performed individually.
